Claims 1-16 are pending in this application which should be examined for errors. In response to the restriction requirement, applicants elected group I, claims 1-3, 6-8 and 16 without traverse and further elected the compound of species 14A. The search as been extended to include compounds of claim 6 wherein R1 and R2 form T1=T1-T1=T1 wherein one or two of the T1's are N. Claims 4, 5, and 9-15 are held withdrawn from consideration as embracing non-elected subject matter.

A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain <u>a</u> patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer <u>cannot</u> overcome a double patenting rejection based upon 35 U.S.C. 101.

Claims 1-5 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1-5 of prior U.S. Patent No. 6,689,883. This is a double patenting rejection.

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-5 and 16 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-6 of U.S. Patent No. 6,689,883. Although the conflicting claims are not identical, they are not patentably distinct from each other because they generically overlap.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Application/Control Number: 10/720,702 Page 4

Art Unit: 1621

Claims 6-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Watanabe et al., US 5,849,741. Watanabe et al. disclose compounds generically overlapping applicants of formula I useful in treating heart disease, hypertension, etc. Ring C may contain a heteroatom, X may represent –NR6- where R6 may represent an optionally substituted aralkyl group, optionally substituted heteroarylalkyl, etc, and Y may represent –CB= where B is amino, -O-R12, with R12 being, arylalkyl, etc. (s. Col. 2, middle). The teaching of Watanabe et al. differs from the teaching of the instant invention in that, although generically disclosed, applicants' compounds are not actually exemplified. Close compounds are made, for example, examples 70-73. It would have been prima facie obvious at the time the invention was made to one of ordinary skill in the art to start with the teaching of Watanabe et al., and especially in view of close compounds already made, to make further generically disclosed compounds and to expect them to be useful in treating heart disease, hypertension, etc.

No claim is allowed. Yurugi et al., US 3,764,598 is cited as state of the art only.

Any inquiry concerning this communication should be directed to Peter G.

O'Sullivan at telephone number (571)272-0642.
